

TSSA Fuels Safety Program	Ref. No.: FS-152-09	Rev. No.:
CHANGE TO FUELS CONTRACTOR REGISTRATION	Date: July 10, 2009	Date:

Change to Fuels Contractor Registration

In an effort to further enhance public safety, the Technical Standards and Safety Authority (TSSA) has implemented a procedural change to contractor registration, effective July 10, 2009.

To obtain a registration, the contractor must meet with an inspector to ensure an understanding of fuels contractor responsibilities and all regulatory safety requirements. The local TSSA inspector will arrange an inspection visit after the application has been processed. Upon successful completion of the inspection, the contractor will be issued a notice of contractor registration from TSSA, which will include a registration number.

As a result of this process change, TSSA can no longer provide contractor registrations to walk-in clients. Applications can be submitted in person at TSSA head office or sent in by fax or mail.

TSSA has made this change to ensure contractors possess a clear understanding of responsibilities and the necessary information to operate in a compliant manner.

The contractor will be charged an inspection fee for this visit in accordance with the applicable hourly rate. Such a visit typically takes between one and two hours.

If you have any questions about this or other contractor issues, feel free to contact TSSA toll-free at 1-877-682-8772.

About TSSA

TSSA is an innovative, self-funded, non-government organization focused on delivering public safety services. It provides not-for-profit regulatory safety services in industry sectors such as fuels, amusement devices, elevating devices, boilers and pressure vessels, operating engineers, and upholstered and stuffed articles. The organization's vision is to be the world leader in public safety services.
