Pickering Man Prosecuted For Working Without A  
TSSA Fuels Certificate

### **Pickering Man Prosecuted for Working Without a TSSA Fuels Certificate**

*Court issues suspended sentence and one-year probation*

**FOR IMMEDIATE RELEASE (Toronto, ON, May 1, 2015)** – Ontario’s public safety regulator, the Technical Standards and Safety Authority (TSSA), has successfully prosecuted a Pickering man for working on fuel-fired equipment without a TSSA-issued Fuels Certificate.

In February 2014, a TSSA inspector received notice of a faulty furnace at a residence in Oakville, Ontario and upon further investigation discovered that the installation had been performed by an uncertified gas technician. Mr. Iqbal Asif of Pickering, Ontario was identified by the TSSA inspector, issued immediate cease and desist orders, and subsequently prosecuted.

Mr. Asif pleaded guilty in the Ontario Court of Justice in Burlington to installing a gas appliance without being the holder of a certificate for that purpose, violating the *Technical Standards and Safety Act, 2000*. The court gave Mr. Asif a suspended sentence and one year probation, prohibiting him from performing any gas work in the province unless otherwise licensed.

“Potentially lethal risks can be created if a fuel-fired appliance is not properly installed,” said John Marshall, Director of TSSA’s Fuels Safety Program. “Anyone installing, repairing or servicing fuel-fired appliances must possess a valid TSSA certification and heed all applicable safety standards.”

If in doubt of a technician’s certification, contact TSSA toll-free at [1-877-682-8772](tel:1-877-682-8772) to confirm whether a gas technician is properly certified.

#### *About TSSA*

The Technical Standards and Safety Authority (TSSA) is Ontario’s public safety regulator mandated by the Government of Ontario to enforce provincial safety regulations and enhance public safety. Throughout Ontario, TSSA regulates the safety of amusement devices, boilers and pressure vessels, elevating devices, fuels, operating engineers, ski lifts, and upholstered and stuffed articles. Its range of safety services include public education and consumer information, certification, licensing and registration, engineering design review, inspections, investigations, safety management consultation, and enforcement and prosecution activities. The organization’s vision is to be a valued advocate and recognized authority in public safety.
